Education

University of Maryland

B.S. IN COMPUTER SCIENCE, B.A. IN ECONOMICS

- GPA: 3.85 / 4
- Made Dean's list every semester of attendance

College Park, MD

Aug. 2018 - May 2021

Oracle Certified Associate, Java SE8 Programmer

ORACLE

Aug. 2017

Skills

Languages Java, Python, Scala, C, JavaScript, TypeScript, Android development, HTML, CSS, SQL, Ruby, VB.net

Frameworks Node.JS, React, Next.JS, Angular, Flask

Tools GraphQL, MongoDB, GIT, Jest, Selenium Web Driver

DevOps Jenkins, Datadog, Linux

Miscellaneous Data Structures, Algorithms, Object-oriented programming, Testing, Computer Vision

Work Experience

Twilio, Inc.

SOFTWARE ENGINEERING INTERN

Jun. 2020 - Aug. 2020

- Wrote tool to analyze 500,000 Datadog dashboards and monitors
- Generated best-practice monitors and dashboards by querying existing monitors and dashboards
- Tool was made immediately available to thousands of Twilio engineers through in-house distribution system
- Programmed primarily in Scala, utilizing cutting-edge libraries such as ZIO and HTTP4S
- Hooked application into proper environment, with formatting checks, testing, and CI/CD

NBCUniversal Media, LLC

SOFTWARE ENGINEERING INTERN

Jun. 2019 - Aug. 2019

- Developed the CNBC brand websites with the aim of driving user engagement with CNBC brands
- Engineered new 404 page which saw thousands of daily visitors, resulting in a drastic increase in user retention
- Learned React, Redux, and GraphQL to make meaningful contributions to a modern technology stack
- Implemented React unit tests using the Jest library to be sure that components performed as expected
- Participated in the Agile development process, gaining insight into industry workflow

University of Maryland, College Park

UNDEGRADUATE TEACHING ASSISTANT

Sep. 2019 - Present

- Performed teaching assistant duties for required object-oriented programming course
- Assisted students with projects and helped reinforce concepts to students
- Graded examinations and quizzes

Software Engineering Projects

Fantasy Football Team Name Generator

DEVELOPER

- Developed a web application which allows Fantasy Football players to find great fantasy football team names
- Engineered with community in mind - anyone can submit team names and vote on their favorite team names
- Integrates with Yahoo API in order to cater recommendations on an individual basis to each user
- Gained valuable experience with Angular, Express, and MongoDB during the development of the site
- Learned Amazon AWS S3 in order to host the web application

QuizCap

DEVELOPER

- Developed Android application which leveraged AI to read text from a picture of class notes
- Implemented simple "one-button" process to create a Quizlet set from the notes by creating a custom parsing algorithm
- Solves the problem of students taking notes but then not being able to study them to their full potential
- Microsoft Azure provided AI services to read the text, and the Quizlet API was leveraged to form Quizlet sets
